Education

Toronto Metropolitan University (Toronto, ON) – Bachelor of Science in Computer Science

May 2025

Summary of Skills

Programming Languages: Java, Python, C/C++/C#, SQL, JavaScript, HTML/CSS, VBA, Bash, Elixir, Rust, Golang

Frameworks and Tools: .NET, React, Node.js, MongoDB, AngularJS, Playwright, Selenium

Interpersonal Skills: Team Building, Adaptability, Organization, Strong Work Ethic, Leadership, Strategic Thinking

Work Experience

Software Developer

Bell – Toronto, ON (Remote)

September 2025 – Present

- Developed complex browser automation frameworks using Playwright and Selenium, automating 10+ internal workflows across 4+ platforms at Bell and reducing manual effort
- Designed and maintained enterprise automation pipelines using Power Automate, integrating 5+ internal tools, while enabling 24/7 automated execution with minimal human intervention
- Deployed and executed automations on on-premise servers, ensuring compliance with internal security, while meeting infrastructure requirements

Software Developer

Devant – London, ON (Remote)

May 2025 – September 2025

- Developed and deployed 10+ Python scripts to automate data processing workflows, transform large datasets, and integrate with REST APIs for high-accuracy data retrieval
- Integrated 5+ APIs and connected cloud/database sources to build automated, reliable reporting pipelines deployed on a weekly schedule
- Built and optimized 8 interactive dashboards in Power BI using DAX and Power Query to deliver actionable insights for multiple new-graduate events
- Configured Azure Virtual Machines to improve performance and reduce execution time for Python-based automated reporting pipelines

Software Engineer Intern, Student

FGF Brands – Toronto, ON

June 2024 – May 2025

- Created 15+ mobile-friendly APIs using .NET for a web application supporting bakeries in managing 1,000+ assets, customer interactions, inventory, and orders
- Leveraged Kendo UI to develop 20+ interactive front-end features, including data grids, dropdowns, and date pickers, enhancing functionality across 50+ forms
- Engineered 10+ custom controls and tailored features to address unique business needs, streamlining workflows for teams across 100+ daily operations; leveraged Power BI for visualizing key performance metrics
- Leveraged C#, SQL Server, and Azure DevOps to integrate over 25 time zone features, aligning scheduling data with regional time zones for accurate, efficient operations in bakeries across Canada and the United States
- Transformed the user interface of a live video wall application using AngularJS, implementing advanced filtering features that enhanced real-time monitoring and improved analytical capabilities for over 50 daily users

Projects

RestLab

October 2025 – December 2025

- Implemented an end-to-end Apple Health data pipeline using libraries such as Pandas, NumPy, scikit-learn, and matplotlib, enabling machine-learning based sleep prediction, anomaly detection, and automated report generation
- Integrated fine-tuned LLMs with time-series data to generate personalized health reports, correlations between sleep stages, exercise, HRV, and stress metrics

StockFlow

November 2024 – December 2024

- Developed "StockFlow," a full-stack inventory management system leveraging real-time tracking and machine learning-powered forecasting to reduce stock shortages by 25%
- Created responsive dashboards and integrated Microsoft Teams alerts, processing 10,000+ records and automating 100+ monthly invoices using React, Pandas, and FastAPI

Certifications

Microsoft Power Platform Fundamentals Certification – Microsoft (Earned: January, 2025)

Microsoft Azure AI Fundamentals Certification - Microsoft (Earned: February, 2025)

AWS Certified Cloud Practitioner Certification - Amazon Web Services (Earned: June, 2025)
