Education

Toronto Metropolitan University (Toronto, ON) – Bachelor of Science in Computer Science

May 2025

Summary of Skills

Programming Languages: Java, Python, C/C++/C#, SQL, JavaScript, HTML/CSS, VBA, Bash, Elixir, Rust, Golang

Frameworks and Tools: .NET, React, Node.js, MongoDB, AngularJS, Playwright, Selenium

Interpersonal Skills: Team Building, Adaptability, Organization, Strong Work Ethic, Leadership, Strategic Thinking

Work Experience

Software Developer

Bell – Toronto, ON (Remote)

September 2025 – Present

- Built automation solutions using Power Automate and Playwright, reducing manual touch time and simplifying repetitive workflows
- Managed on-premises Nginx infrastructure hosting Podman containers that support automated business processes and production workloads
- Created multiple Power Automate custom connectors for internal Flask APIs, allowing enterprise services easier to access and reuse across the company
- Integrated Google Gemini into internal automation workflows to improve output quality and reduce the amount of manual review required

Software Developer

Devant – London, ON (Remote)

May 2025 – September 2025

- Developed 10+ Python scripts to automate manual processing, transform complex datasets, and incorporate both company and third-party REST APIs for accurate data retrieval
- Led the integration of 5+ APIs ran on automated reporting pipelines, deployed on a weekly schedule, as well as connected them to cloud/database sources
- Maintained and optimized 8 interactive dashboards in Power BI, through the use of DAX and Power Query, to deliver several insights regarding student interests and interaction for multiple new-graduate events
- Configured Azure Virtual Machines to improve performance and reduce execution time for Python-based automated reporting pipelines

Software Engineer Intern, Student

FGF Brands – Toronto, ON

June 2024 – May 2025

- Created 15+ mobile-friendly APIs using .NET for a web application supporting bakeries in managing 1,000+ assets, customer interactions, inventory, and orders
- Used Kendo UI to develop 20+ front-end features, such as data grids, dropdowns, and date pickers, further enhancing functionality across 50+ multi-purpose forms
- Utilized C#, SQL Server, and Azure DevOps to create over 25 time zone features, being able to align scheduling data with regional time zones for efficient operations in bakeries across Canada and the United States
- Recreated the user interface of a live video wall application through AngularJS, managing to implement different filtering features that enhanced monitoring in real time and improved analytical capabilities for 50+ users

Projects

RestLab

October 2025 – December 2025

- Created an Apple Health data pipeline with libraries such as Pandas, NumPy, scikit-learn, and matplotlib, resulting in a solution consisting of machine-learning based sleep prediction, anomaly detection, and automated reports
- Fine-tuned LLMs with time-series data to produce personalized health reports, correlations between sleep stages, exercise, HRV, and stress metrics

StockFlow

November 2024 – December 2024

- Developed a full-stack supply chain management system, using real-time tracking and machine learning powered forecasting in order to reduce stock shortages by 25%
- Created responsive dashboards and integrated Microsoft Teams alerts, processing 10,000+ records and automating 100+ monthly invoices using React, Pandas, and FastAPI

Certifications

Microsoft Power Platform Fundamentals Certification – Microsoft (Earned: January, 2025)

Microsoft Azure AI Fundamentals Certification - Microsoft (Earned: February, 2025)

AWS Certified Cloud Practitioner Certification - Amazon Web Services (Earned: June, 2025)
